

Anel Martéz

Junior Full Stack Developer

Panamá, Chilibre anelmartez18@gmail.com +507 6635-7861 www.linkedin.com/in/anelmartéz

Profile

I am a Junior Full Stack Developer with a solid background in Systems and Programming, and an intermediate level of English (B2). I specialize in web application development using technologies like JavaScript, Python, Django, and React. I have led complete projects, including an e-commerce platform and a note management application, applying advanced knowledge in API integration and databases such as PostgreSQL, MySQL, and MongoDB. My experience includes technical support in hardware and software, problem-solving skills, and the ability to work in a team and quickly adapt to new technologies.

Professional Experience

Komex Internacional, S.A. / Tandor Comercial. (Furniture Store)

Panamá | December 2022 – May 2024

Customer Service Officer

- Redesigned the customer service flow, reducing waiting times by 25%.
- Provided technical support, solving hardware and peripheral issues for various departments.
- Implemented simple technological solutions to optimize the team's work tools.
- Delivered personalized customer service, efficiently resolving issues.
- Supported sales and implemented technological solutions to improve performance.

Brand Sport Panamá, S.A. / Sport & Fashion. (Sportswear Store)

Panamá | September 2021 – April 2022

Sales Advisor

- Contributed to a 15% increase in quarterly sales through effective sales strategies.
- Improved point-of-sale systems and resolved minor technical issues.
- Provided specialized advice to customers.
- Managed the team in the supervisor's absence and handled financial operations with precision.

Relevant Projects

E-commerce Platform for Computer Components

- Developed an online store using Django (backend) and React (frontend), with shopping carts, tax calculations, and WhatsApp integration for order management.
- Deployed the backend on Render and the frontend on GitHub Pages, optimizing the deployment process.
- Implemented APIs for product management and shopping cart, connected to MongoDB.

Note Management Application

- Created an application to manage notes using Django and PostgreSQL, with an advanced keyword search system.
- The backend manages the search API and assigns unique IDs to notes, optimizing database queries.

Technical Skills

- **Programming Languages:** JavaScript, Python, Java (Basic)
- **Technologies:** HTML5, CSS3, GitHub
- **Frameworks:** React (Intermediate), Angular (Basic)
- **Databases:** PostgreSQL, MongoDB

Languages
